Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

State Management: Redux Toolkit, Zustand, SWR

UI Libraries: Ant Design, shadcn/ui, Tailwind CSS

Backend & APIs: Node.js, REST API, Firebase, Commercetools

Tools: Git, Vite, Webpack, ESLint, Prettier, Husky, Vitest, Playwright

Methodologies: Agile/Scrum, CI/CD, Code Review

Project Experience

 Pawstman - REST API Client

[Link Project](#) *Team Project | React, Next.js, TypeScript, Redux Toolkit, Ant Design, Firebase*

My Key Contributions:

- Developed design system and UI components, created visual concept for the application
- Implemented Response Viewer and Body Editor sections with validation and syntax highlighting
- Built code editor using Monaco Editor with theme switching and language support
- Developed variables system with value substitution in requests
- Configured routing and protected routes with authorization checks
- Implemented loading pages and application state management
-

Tech Stack: React 19, Next.js 15, TypeScript, Redux Toolkit, Ant Design, Firebase, Monaco Editor

 PosterShop - E-commerce Platform

[Link Project](#) *Team Project | React, TypeScript, Vite, Zustand, Tailwind CSS, Commercetools*

My Contributions:

- Developed authentication and registration system with form validation
- Implemented product catalog with filtering, sorting, and search functionality
- Integrated Commercetools API for product and cart management
- Created responsive UI components using shadcn/ui and Tailwind CSS
- Set up shopping cart with promo codes and cost calculation
- Optimized performance through lazy loading and pagination

Tech Stack: React, TypeScript, Vite, Zustand, Tailwind CSS, shadcn/ui, Commercetools API

Education & Certifications

RS School | React Course

2025 | [Certificate](#)

RS School | JavaScript/Front-end Course

2024 | [Certificate](#)

Languages

- **Russian:** Native
 - **English:** B1 (Intermediate) - Technical documentation reading, working with English documentation
