🔧 Technical Stack

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3
State Management: Redux Toolkit, Zustand, SWR
UI Libraries: Ant Design, shadcn/ui, Tailwind CSS
Backend & APIs: Node.js, REST API, Firebase, Commercetools
Tools: Git, Vite, Webpack, ESLint, Prettier, Husky, Vitest, Playwright

📁 Project Experience

🐾 Pawstman - REST API Client

Project repository: github.com/ek-ole/rest-client-app *Team Project* | React, Next.js, TypeScript, Redux Toolkit, Ant Design, Firebase

- Developed design system, UI components and visual concept for the application
- Implemented core modules: Response Viewer, Body Editor (Monaco Editor) with validation and syntax highlighting
- Built variables system with value substitution in requests
- Configured routing and protected routes with authorization checks
- Implemented loading pages and application state management

🛒 PosterShop - E-commerce Platform

Project repository: github.com/ek-ole/eCommerce-Application *Team Project* | React, TypeScript, Vite, Zustand, Tailwind CSS, shadcn/ui, Commercetools

- Developed authentication and registration system with form validation
 - Implemented product catalog with filtering, sorting, and search functionality
 - Integrated Commercetools API for product and cart management
 - Created responsive UI components, optimized performance via lazy loading
